Work Experience

Web Surfing Studios – Full Stack Web Developer Intern, (Remote)

July 2025 - Present

- Phase 1&2
 - Built ASP.NET MVC C# full-stack application for a pet boarding facility to be able to track and manage pet boarding bookings utilizing Entity Framework & migrations to manage MySQL instances and AWS Simple Email Service to provide email confirmations & password resets.
 - Completed project work as part of a volunteer developer team focused on building free, accessible technology for public use.
 - Utilized industry standard workflows, processes, and platforms like agile methodology and Azure DevOps to simulate a professional environment.

Ice Shaker – Custom Team Lead, (Southlake, TX)

April 2022 - Present

- Supervised the team responsible for fulfilling custom web orders utilizing modern ecommerce tools like Shopify and Shipstation.
- Trained team members to use a Radian CO2 Galvo Laser and corresponding software as well as image editing techniques and best practices to maintain consistent QA/QC.
- Contributed to annual increases in profit and accuracy while increasing net workflow/productivity.

AmerisourceBergens (Cencora) – Inventory Manager, (Roanoke, TX)

June 2019 - January 2022

- Coordinated the inventory, orderfilling, and restocking of multiple departments within the medical distribution center, ensuring accuracy, efficiency, and timely departures of all trucks/orders.
- Supported all active departments with priority order tasking/fulfillment while aiding those that were understaffed or struggling.
- Maintained an average productivity level that was 40-50% higher than the company standard allowing for flexibility in staff distribution on given shifts.
- Selected by senior staff as a multiple time EOTM and had several months of perfect accuracy in regards to order fulfillment.

Education

Springboard Software Engineering Career Track, (Remote)

Graduated February 2025

- Certificate of Completion

Skills

- Languages: Javascript (Main), Python, C# / .NET , HTML, CSS, Bash
- Frameworks: React, NextJS, AstroJS, Vite, ASP.NET MVC, Bootstrap, Tailwind
- Version Control Systems & Cloud: Git, Vercel, Render
- Databases: PostgreSQL, MySQL, Sequelize, Drizzle, JSON Schema
- Agile Methodology & Azure DevOps
- Misc: NodeJS, Docker, AWS S3, Better Auth, Stripe, ExpressJS, JWT, Jinja, Flask, Polar, Arcjet

Projects

Peptide Sciences - Under Development (<https://peptide-project.vercel.app/>)

- Developing a Next.js application for a peptide startup that includes Better Auth user authentication, a Drizzle PostgreSQL database, ecommerce functionality, and automated email services/support to better communicate with customers.

TCG Clone (<https://www.capstone2frontend.xyz/>)

- Created a full-stack React application that emulates popular trading card enthusiast auction sites.
- Implemented a backed API and database using Express.js and Sequelize as well as multiple third party APIs in order to supply relevant card data. Encrypted user credentials and prevented fraudulent CSRF with Bcrypt and JSONWebTokens.
- Developed a responsive frontend using Vite/React incorporating libraries like react-router-dom, js-cookie, and reactstrap.
- Moved website image & file storage from local AppData folder to AWS S3 buckets to avoid rate limits and allow the website to horizontally scale as needed.

Alcoholics Asynchronous (<https://capstone1-34f1.onrender.com/>)

- Designed & built a full-stack Python application that allows users to browse a database of drink recipes as well as create an account and add their own.
- Utilized Flask and SQL Alchemy to implement the backend API/router and create database models. Used Jinja, WTForms, and Bootstrap to create the Frontend/UI. Deployed a PostgreSQL database to Supabase in order to store data in the cloud.

Portfolio Website (<https://portfolio-host-steel.vercel.app/>)

- Custom web app created to host project links and descriptions as well as an up to date resume and certification.
